INTRODUCTION

This is the official poster template of the XI MACI 2027. The header and the footer are common to all posters of the congress and must not be modified; the rest of the content is free.

- A0 portrait size (84.1 cm × 118.9 cm).
- Languages: English, Spanish or Portuguese (`lang` option of the theme).
- References can be cited [1].

AIM

A highlighted block (`alertblock`) can be used to stress the aim or the main result of the work in one or two sentences.

PAPER SUBMISSION

The written paper (2 to 4 pages) is submitted through the OCS platform using the congress paper template. This template is for the poster displayed during the congress.

METHODS

If preferred, the full width can be used (or one- and two-column layouts can be alternated). Equations and theorems are written as in any LaTeX document:

$$\min_{u\in U} J(u) = \int_0^T \left(\|x(t) - x_d(t)\|^2 + \alpha \, \|u(t)\|^2 \right) dt, \qquad \dot{x} = f(x,u). \tag{1}$$

Theorem 1. *Under suitable assumptions, problem (1) admits at least one optimal solution.*

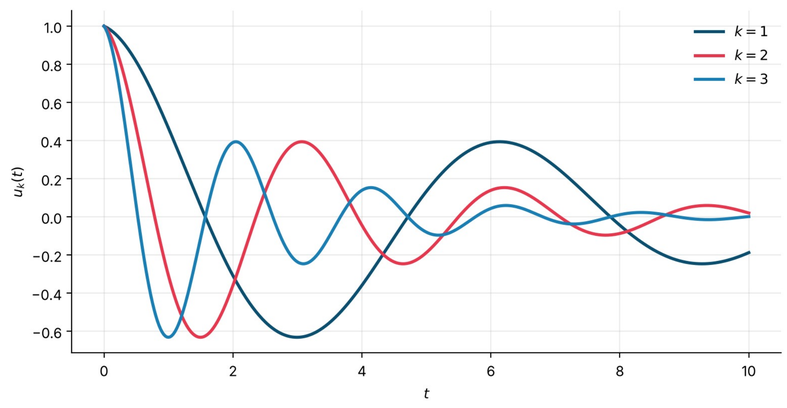

Figure 1: Figures with captions can be included in the one-column layout.

RESULTS

- Your text here …
- …and here [2].

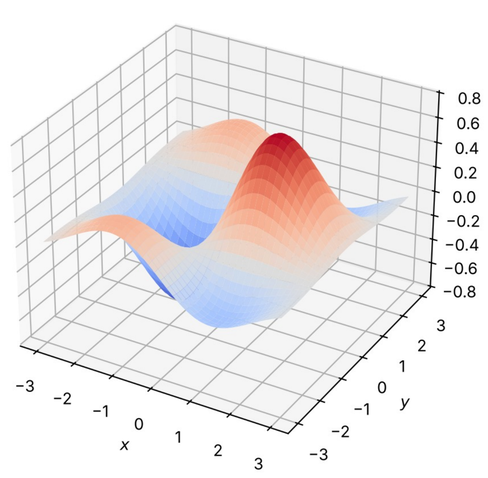

Figure 2: Figures can also be included in the two-column layout.

CONCLUSIONS

- Your text here …
- …and here [3].

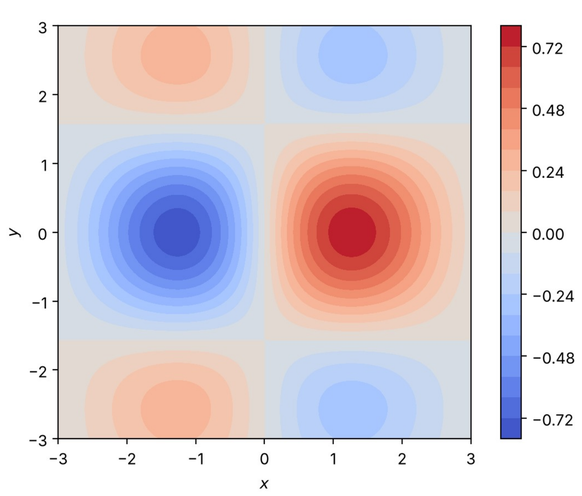

Figure 3: Another caption.

ACKNOWLEDGEMENTS

Acknowledgements (projects, grants, fellowships) go here.
